

Product:

Board Retaining Clamp

Product Code :

AODFBR01

Product Description:

Manufactured by drop forging steel, a metal-forming process that involves shaping heated metal by applying compressive forces.

Weight:

0.55kg

Dimensions:

Designed to suit 48.3mm OD tube and 38mm scaffold boards

Testing/Standards:

BS1139

Zinc plated to BS EN 12329:2000

Guidance:

Transportation - care must be taken when transporting fittings, ensuring that all fittings are secured in their storage and unable to become loose. Straps are used in appropriate areas and there is no risk of the strap fraying or becoming cut by any sharps.

Handling - care must be exercised when manually handling fittings, in line with manual handling procedures.

Storage - all components must be stored in a manner that limits any detrimental environmental effect due to weather or corrosive substances. Please note the safe working load on each storage component prior to loading and stacking.

Inspection - routine inspections should be scheduled, it is best practice to inspect storage products before each work shift and after any occurrence which could affect the integrity. All couplers should be properly maintained and examined before use to ensure that there is a free-running, lightly lubricated, fit between the butts and bolts.

Traceability - all fittings supplied by Trademagic are fully traceable with unique identification code.
