

**Product:**

Scaffold Board

**Product Code :**

AOWB08/AOWB10/AOWB13

**Product Description:**

Manufactured from European whitewood, machine graded and supplied complete with end band, catered to the industry standard 1.2m support length

**Dimensions:**

8ft (2.4m)/10ft (3.0m)/13ft (3.9m)

225mm in width

38mm thickness

**Weight:**

11.69kg (8ft)

14.62kg (10ft)

19.00kg (13ft)

**Testing/Standards:**

Sourced from PEFC registered companies

Graded to BS2482:2009

NASC audited and approved

**Guidance:**

Transportation - care must be taken when transporting boards to ensure they are not bent beyond their limits, while ensuring boards are secured to the vehicle using straps at appropriate intervals.

Handling - care must be exercised when manually handling boards. It is recommended that boards are held upright, not side on, and that two persons handle each beam, one at each end, where the weight lift is above 15kg.

Storage - boards should be stored in a safe manner, horizontal with support at appropriate intervals to alleviate and damage or distortion.

Inspection - routine inspections should be scheduled, its is best practice to inspect boards structures before each work shift and after any occurrence which could affect the integrity.
